| AWS           | Agile      | Git/ Github   |

### PROFESSIONAL EXPERIENCE

#### Full Stack Engineer, Elexoft Technologies

May 2025 - Present

- Working on a real-world ERP system as part of my current role
- Developing and maintaining full-stack web applications using modern technologies
- Building responsive and user-friendly front-end interfaces for better user experience
- Designing and integrating RESTful APIs to ensure smooth data flow between frontend and backend
- Managing databases efficiently with a focus on performance, optimization, and security
- Collaborating with team members to deliver high-quality and scalable software solutions
- Identifying and fixing bugs to improve application performance and stability

### PROJECTS

#### Next.js Blog Platform

<https://next-blog-app-deployment.vercel.app>

- Built a multi-role blogging platform with separate User and Admin dashboards.
- Users can browse posts, leave likes and comments; admins manage all content via a dedicated panel.
- Implemented Cloudinary for image uploads .

#### Library Management System

<https://library-management-system-nextjs-eight.vercel.app>

- Developed a personal media vault where each registered user sees only their own files and folders.
- Supports folder creation, media uploads via Cloudinary, and strict per-user data isolation.
- Secured with JWT authentication ensuring zero cross-user data leakage

### EDUCATION

#### BS Computer Science

2021 - 2025

- Government College University
- Major in Computer Technology.
